

HospiceChoice Rx Core Clinical: Standard Reports

Standard reports are provided twice monthly.
Reports include the following:

High-Cost Medications

What data will the Hospice see?

- Cost per claim for the top 15 high-cost medications

Benefits to the Hospice

- Identify high-cost medications that increase unnecessary organizational spend on medications
- Identifying prescribing habits that can be tailored to allow more cost-effective strategies that achieve clinical goals

Non-Formulary

What data will the Hospice see?

- All medications billed to the Hospice that were non-formulary

Benefits to the Hospice

- Identify prescribing habits outside of best practice formulary medications
- Identify possible opportunities to de-escalate unnecessary medications
- Assist in educational efforts of therapeutic alternative strategies

Brand Medications

What data will the Hospice see?

- All medications billed to the Hospice that were brand medications

Benefits to the Hospice

- Identify unnecessary prescribing of branded medications that are typically higher cost
- Identify pharmacies that are not substituting generic formulations for prescriptions

High-Cost Patients

What data will the Hospice see?

- Top five high-cost patients including all claims billed to the patient

Benefits to the Hospice

- Identify patients who will have opportunities for de-escalation of polypharmacy and therapeutic substitution to more cost-effective formulary options
